

Our procedure is simple

Plan with your doctor your surgery (in mild sedation and local anesthesia) where you won't feel any pain and that will last 30 min

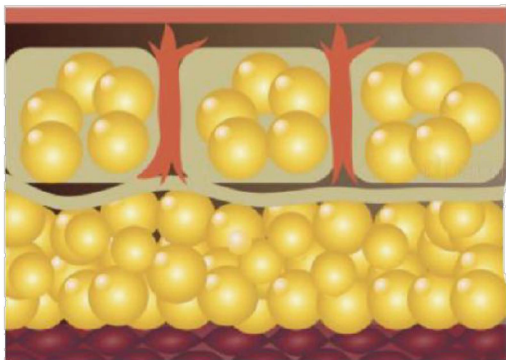

Contact us at our number 800 400 439 and we send you the Privacy forms and the request of activation of the service and all the info about the payment that must be anticipated (if you want it can also be financeable).

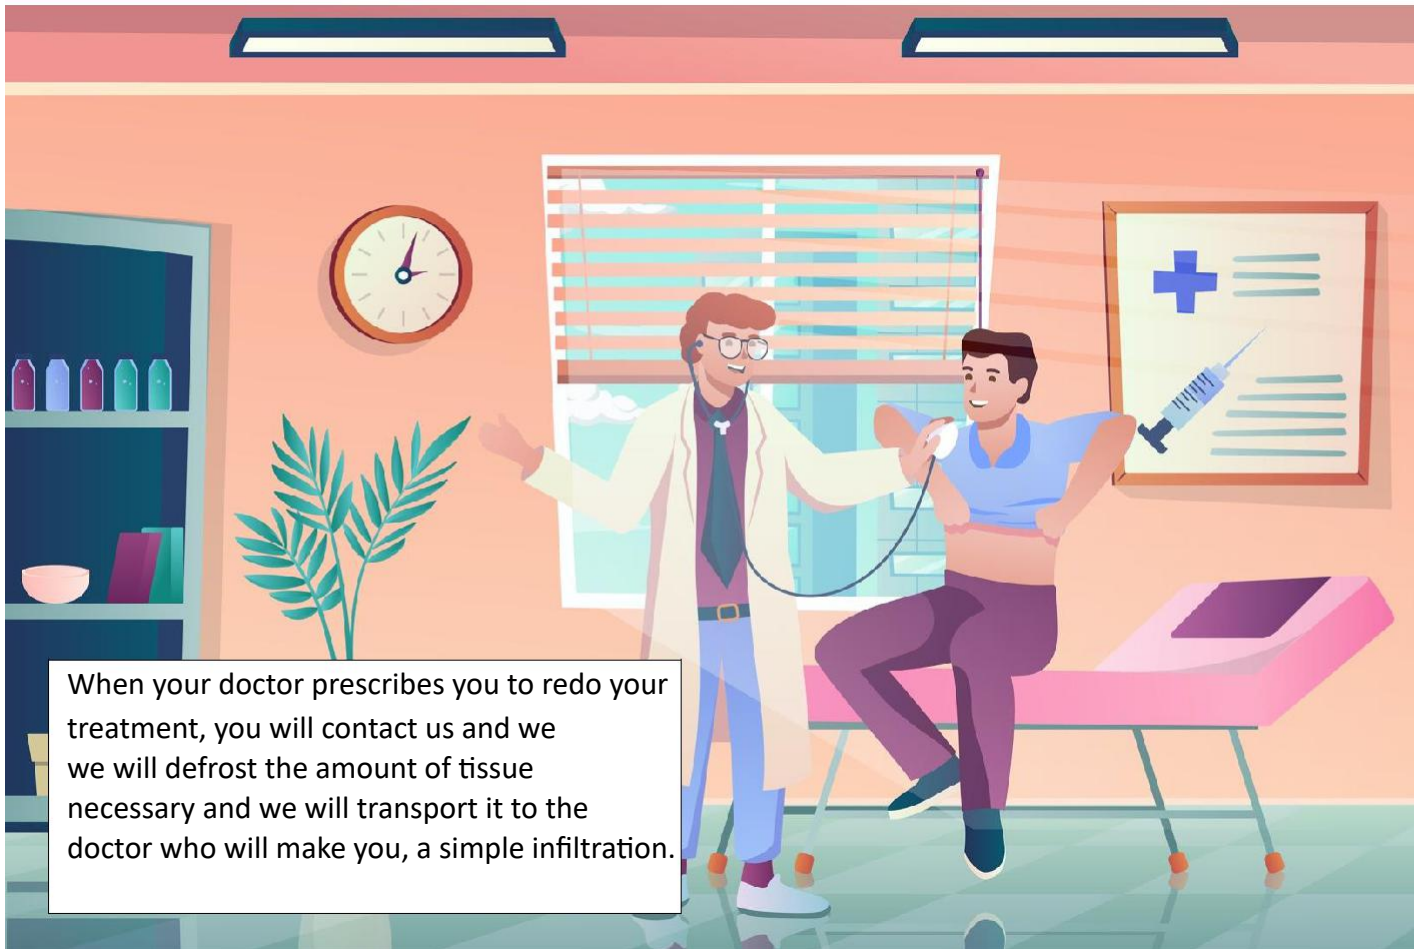

During the surgery your doctor takes the necessary amount of tissue for a first infiltration and for subsequent treatments that he considers most appropriate for you and that we cryopreserve up to 6 years

We analyze and criconserviamo in nitrogen in small single dose rates at the Bank of Skin and Tissues RER Cesena (headed by the Center Burns Bufalini Hospital).

We will provide your doctor the device for your adipose tissue harvest with a closed-loop system that guarantees total safety and sterility.

Our procedure is simple

When your doctor prescribes you to redo your treatment, you will contact us and we will defrost the amount of tissue necessary and we will transport it to the doctor who will make you, a simple infiltration.
